

Pro Bono

Cloud and Backup-Recovery Assessment

Cloud Solution IT is a purpose-built MSP-MSSP for small-midsize companies that depend on IT.

Description of the Assessment

The CSIT Cloud Usage and Backup-Recovery Assessment is designed for IT Departments that want a qualitative assessment of their Cloud strategy and Backup-Recovery position. We are Microsoft Silver partners and can include analysis of the use of Microsoft 365 as part of the assessment.

Discovery Consultation Call

Cloud Environment

In this 20 to 30-minute call, our Cloud subject matter experts will interview you and ask questions about the firm's current and planned Cloud enablement strategy.

Discovery Consultation Call

Backup-Recovery

In this 20 to 30-minute call, our Backup-Recovery subject matter experts will interview you and ask questions about the firm's current IT recovery strategy.

Discovery Consultation Call

Microsoft 365 Usage

In this 20 to 30-minute call, our Microsoft 365 subject matter experts will interview you and ask questions about the firm's current and potential use of 365.

Cloud Usage and Backup-Recovery Assessment Report

A management-grade Cloud Usage and Backup-Recovery Assessment Report is created. Strategies to leverage Cloud technologies and MS 365 to increase overall IT infrastructure effectiveness will be provided.
